

Members of the CT Judiciary Committee,

I want to express my opposition to HR 6355. Risk protection warrants should not circumvent a police officer investigation. The law on risk warrants as is depends upon the expert assessment of two unbiased and unattached law enforcement officers. Opening up to more emotional complainants is a risky step and the burden of proof falling on the property owner to prove they are not a risk is costly and an infringement on the owner's rights.

Thank you for your time and service

Richard Fisher
